DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 3-6, 7, 9, 11 and 16, in so far as they are drawn to nucleic acids encoding a mammalian SNORF62 receptor, classified in class 536, subclass 23.5.
 - II. Claims 2-6, 8, 10 and 12-15, in so far as they are drawn to nucleic acids encoding a mammalian SNORF72 receptor, classified in class 536, subclass 23.5.
 - III. Claim 18, drawn to SNORF62 protein, classified in class 530, subclass 350.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the nucleic acids of the different inventions have different nucleotide sequences, encode different proteins, are located on different chromosomes, and have different tissue expression patterns.

The SNORF62 protein of invention III is related to the nucleic acids of invention I in that the nucleic acids encode the protein. Although the protein and nucleic acids are related in this way, they are distinct inventions because they are physically and functionally distinct chemical entities, the protein can be recovered from natural sources, and the nucleic acid can be used in methods other than those of recombinantly producing the protein, such as in hybridization.

Art Unit: 1646

Inventions II and III are unrelated. In the instant case the nucleic acids of invention II and the protein of invention III are physically and functionally distinct chemical entities, and the nucleic acids do not encode the protein of invention III.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their divergent subject matter, different classification and requirement for non-coextensive search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
